

GEE ASPHALT SYSTEMS, INC.

Established 1950 / Family-Owned

Our Foundation

Albert Gee founded Gee Grading & Excavating in 1950 and became highly successful in the region. However, Albert was concerned about the safety and health of his employees, and the negative impact on the environment even then recognized to be associated with popular coal tar coatings.

A visionary before his time, Albert's desire was to find more effective means to preserve the ever increasing volume of asphalt pavement found in public streets, roads and highways, airports, commercial and shopping center parking lots, and industrial and manufacturing sites across the nation.

In 1973, Albert launched Gee Asphalt Systems which enabled him to tap into years of extensive research done in the then underutilized field of Asphalt Preservation.

Albert's research into the properties of aging asphalt binders and how they quickly degrade from exposure to environmental forces and everyday service led him to the realization that effective preservation practices significantly extend the life of asphalt surfaces. Following his study of many coatings and processes, Albert discovered that

GSB® offered:

- lower life cycle costs
- longer wear
- superior performance compared to the "top only" coating processes
- EPA-tested: no short-term or long-term detrimental effects on the environment

Combined with the unsurpassed compatibility of Gilsonite with all types of asphalt pavements, the GSB® Product Line was a clear choice.

Today, Albert's hard work and perseverance in finding the safest and best asphalt preservation product has paid off in our continued growth and the loyalty of our clients nationwide!

But this is only the beginning of our story.

Gee Asphalt Systems, Inc.

- Family-Owned and Operated.
- Recognized & Trusted Nationwide.
- Long-established Industry Leaders.
- Leaders in Advancing Preservation Strategies.
- Our skilled team of technicians and craftsmen have a combined experience of 150+ years.

As one of approximately 65 GSB® dealers, Gee Asphalt is the ONLY GSB® applicator with 44+ years of continuous experience traveling to projects nationwide.

Making Good Pavements Last Longer!

We offer Expert Quality and Service! From seal coats incorporating GSB-88® (Gilsonite Sealer Binder) to crack sealing to striping removal and applying services, Gee Asphalt Systems, Inc. provides a comprehensive suite of products and services that encompass an overall asphalt preservation strategy.

We Make Good Pavements Last Longer Nation-wide!

Dan Gee is the current President of Gee Asphalt Systems Inc. Dan worked for years in the family-owned company, and has been in the asphalt preservation business since 1973.

In April of 1984 Dan purchased Gee Asphalt Systems and began the steady growth that has continued uninterrupted ever since. Dan has continued his father's philosophy of on-going research into effective preservation processes including crack sealing and asphalt preservation. After personally witnessing the exceptional performance of Gilsonite products in Midwestern installations, Dan was determined to bring his philosophy of quality products and service to a nation-wide audience.

Gee Asphalt has experienced 1600% growth as testimony to these principals from 1984 until today.

Dan's vision is:

- to offer cost-effective preservation strategies
- incorporate client training and knowledge
- use only the best products available
- provide superior service

To keep pace with these objectives Gee Asphalt has moved briskly into the new millennium embracing change, upgrading machinery and our fleet to represent the latest technology in high production tools and equipment, and hiring only the best work force.

Gee Asphalt also remains old-fashioned. We hold fast to a traditional belief that our clients deserve a hard days work. Honesty is of utmost importance to us and we believe that integrity is not just a word, but the way to deal with other people on a day-to-day basis.

**Over 100,000,000 yd.²
of GSB-88® applied!**

If you are looking for honest, hard working, reliable, and trustworthy partners to work with then look no further. We know these traits bring confidence, respect, and the loyalty of our clients. You can be sure your money is well invested and the quality you deserve is what you'll get when you choose Gee.

Call for a free consultation and cost estimate and we will help you establish your Asphalt Preservation Program today!

We Take Great Pride In The Work We Do!

We ensure our quality with:

- Scrupulous cleaning & preparation before applications,
- Research on current and forecast weather conditions,
- Vast experience in scheduling tough, complex projects,
- Arrival with all necessary equipment
- Routine equipment maintenance,
- Effective traffic control techniques and equipment,
- Hands-on training for all supervisors and crew,
- Continuing education: best practices, techniques and processes,
- Customer Satisfaction Surveys,
- AND Follow-up after the sale to ensure satisfaction.

**Making
Good Pavements
Last Longer**

It Was Truly A Pleasure To Do Business With Gee Asphalt Systems, Inc.

"Gee Asphalt applied GSB" to 23,518 sq yds of gateway entry and parking lots for the City. We are very pleased with the results..."

From the salesperson to receptionist, owner to crew, these top-notch professionals exceeded our expectations with their fast and efficient, high quality work. Knowledgeable and courteous describes their staff and crew. I would highly recommend them."

*- Ms. Angie Ellison
Engineering Technician, City of Eagan Minnesota*

"The airport was experiencing deteriorating pavement conditions...attributing to FOD concerns for aircraft operations, in particular, the F-16's on the airfield...a fast paced project was designed to crack seal and seal coat the taxiway until a rehabilitation project could be funded. Gee Asphalt Systems, Inc., coordinated an aggressive schedule necessary to perform the work within the 18 calendar days...the crew did an exceptional job coordinating the project to ensure safe progress while not disrupting aircraft operations. The project was very successful ending on time and on budget. All airfield users agree it is a great improvement rejuvenating a deteriorated taxiway into an almost new system. Thank-you for introducing us to a cost-effective and efficient product!"

*- Shaun Germolus
Director of Operations, Duluth International Airport*
